

平成29年度《第8回》

重粒子線 医工連携セミナー

■ 日時 2017年10月18日(水) 13:30~14:30

■ 会場 重粒子線医学センター カンファ室

■ 講師 Dr Ivan WK THAM

Department of Radiation Oncology, National University Cancer Institute, Singapore (NCIS)

Current Status of Radiation Oncology in Singapore

The field of radiation oncology in Singapore has advanced rapidly in recent years with new technology, expertise and clinical evidence. These changes have happened alongside the rise in quality, complexity and costs in the entire healthcare delivery arena in Singapore. We discuss some of the main principles underpinning our healthcare system and see how they apply to radiation oncology. We will also look at some of the future opportunities and challenges in our field, such as adoption of particle therapy, and emphasis on value-driven care.
